All Together

This year, Emmie is leading the SWENext Club as its president, helping to organize all events that brings together students from across San Diego County. A dedicated speaker at this year's Day, addressing over

model. Emmie also moderated this year's College featuring several SWE college students and alumni from around the country. In addition to her work with SWE, Emmie was a speaker at university last year to apply convolutional neural networks to denoising the results of a form of image microscopy. She is the founder of a 501(c)(3) nonprofit that works to highlight interdisciplinary research in data science for high school students. Emmie's work includes mentoring students in various STEM subjects early in their careers. She was named a National Center for Women & Information Technology (NCWIT) Fellow in 2023 and 2024, as well as the SWENext Award Recipient in 2024.

Angelina Kim
Grade 12

Angelina has always been passionate about inventing and promoting public safety, present in her role as a lifeguard scout and her participation in the International Science and Engineering Fair (ISEF) and Institute of Electronics Engineers.

to alleviate the underrepresentation of women in STEM, hosting free monthly STEM workshops and NASA STEM challenges. Over 9,000+ girls from 300+ schools participating in the program.

Breanna Thayillam
Grade 12

As the co-president of the SWENext Club, Breanna has spent over 100 hours with SWE, empowering girls in STEM. She led her school's first STEM Workshop and Hackathon with 75 participants from 15 countries, developed a mobile app, and mentored 100 students at local STEM events. Breanna was awarded the SWE STEM in Action and NCWIT STEM Leadership Mention for her efforts. Outside of SWENext, Breanna has participated in hackathons and app challenges to further pursue her passion for web/app development, earning a Technovation 2023 Global Award and a Special Recognition for the 2023 Code.org Challenge.

Eniola Aloba
Grade 12

Eniola has served as a member of the SWENext Club and participated in the Leadership Academy. Her experience has given her a sense of purpose and a STEM career. In her

responsive web application that can be accessed on any device as we are currently living in the digital age.

Learning the importance of community at a young age, a member of the National Honor Society, the Science Olympiad Society, and the Army Educational Outreach Program, Eniola's goal is to equip, encourage, and prepare students with the correct skills to thrive in STEM careers.

Lily Bertrand
Grade 12

Lily, an aspiring gardener and passionate about public education, particularly for underrepresented groups, is continually working through her contributions to a nonprofit organization that has made countless

contributions. As a third-year media director for FIRST Robotics Competition 2543 where she has played a pivotal role in amplifying their achievements and inspiring the next generation of students. She established a cohesive visual brand to create a recognizable aesthetic that makes the team's content appealing and memorable. Lily is also a third-year member of the Student Council, where she is the president for the 2024/2025 school year. She has made numerous connections through her volunteer work in San Diego, having volunteered at over 15 events in the

Smrithi Sudharsun
Grade 9

Smrithi Sudharsun is an engineer and a rising Edison Academy Magnet majoring in electrical SWENext, she participates in projects, her school's competitions, and other activities. She is passionate about art, visits an art museum, is an art teacher, and has published a book. She hopes to make an impact on the medical field and the generation of women in STEM.

Serena Gandhi
Grade 10

Serena is a passionate student interested in integrating sustainable education. She founded a nonprofit introducing nature-inspired design projects and interactive learning. Her interest in environmental fields is reflected in her Girl Scouts initiatives, where she organizes community cleanups, and spearheads tree-planting efforts. Her experience spans developing bio-inspired gadgets and assisting in research, highlighting her dedication to technology that benefits both people and the planet.

McKayla Davis
Grade 10

McKayla is a rising junior passionate about engineering and pursue a career in mechanical engineering. Outside of SWENext, she is involved in other STEM organizations such as Robotics, Technology, Aerial Robotics, and the 3D printing club. In her free time, she likes to teach 3D modeling, work in the field of engineering, and come up with new engineering projects.

Giovanna Carvalho
Grade 11

Zenia Haroon
Grade 11

Zenia is a senior at Glenview High School and advocates for STEM education.
