I. EXECUTIVE SUMMARY

DESCRIPTION OF THE SERVICE

The Society of Women Engineers is a not-for-profit organization dedicated to supporting girls interested in pursuing engineering. SWENext is their K-12 program to inspire students to pursue a career in STEM.

CAMPAIGN OBJECTIVES

INCREASE SWENEXT ENROLLMENT

- 25% increase in SWENext club member registrations
- Establish SWENext clubs in at least 10 new regions or countries.

- Partner with 15+ collegiate chapters for mentorship
- Facilitate mentor-mentee matches for 200+ students.

IMPROVE PARTICIPANT SATISFACTION

ENHANCE SOCIAL MEDIA ENGAGEMENT

- 100% growth in social media engagement
- Increase the followers on SWENext's social media by 50%.

CELEBRATE WOMEN'S
HISTORY MONTH WITH
SWENEXT!

M A R C H 1 - 3 0 T H

CAMPAIGN ACTIVITIES AND SCHEDULE

CURIE-OSITY KITS

- Curie-osity kits inspire girls with Mark Rober's videos and toys, offering a chance to visit CrunchLab.
- Weekly kits sent to SWENext clubs
- Enhances STEM education

\$8,628

BIG SIS MENTORSHIP

- Matches high school girls with collegiate mentors from SWE.
- Provides valuable guidance, support for academic, career, and personal development guidance

\$0.00

WOMENGINEERING PODCAST

- Celebrates the achievements of women in STEM.
- Inspirational interviews with STEM leaders
- Weekly episodes

\$802.78

#BeThatEngineer SOCIAL MEDIA

- March features three special holiday challenges: SheSTEM Spotlights, #Pioneering, and #GREENgineering.
- Designed to grow social media
- Fun challenges - anyone can participate!

\$5,502.00

**TOTAL
BUDGET** \$14932.78

CONCLUSION

The Society of Women Engineers is looking for \$14932.78 to grow and enhance their K-12 program, SWENext.

CONCLUSION

The Society of Women Engineers is looking for \$XXX to grow and enhance their K-12 program, SWENext, in return for XXXX.

II. DESCRIPTION OF THE EVENT, PRODUCT, OR SERVICE

Our 31-day #BeThatEngineer marketing campaign is designed to grow and enhance SWENext, the Society of Women Engineers' K-12 program.

What is SWENext?

SWENext is a not-for-profit K-12 program sponsored by the Society of Women Engineers (**SWE**) collegiate organization designed to inspire more girls and those of underrepresented backgrounds to pursue STEM, with a focus on **engineering**, given the alarming gender disparities in the field. For more than seven decades, SWE has given women engineers a unique place and voice within the engineering industry, and SWENext aims to empower students to prepare for careers in engineering and technology and provide opportunities to learn and network with peers, role models, and engineering professionals. With locations across the globe, SWENext clubs can be started up by any club connected to the SWE organization, and can run through volunteer efforts. Female students can become "SWENext-ers" either through joining an existing club or starting their own, or registering for membership independently. To maximize their reach, SWENext is free to join and provides students access to programs, mentors, and resources designed to develop leadership skills and self-confidence to #BeThatEngineer.

FULL-TIME EMPLOYED
ENGINEERS BY GENDER IN 2021

Research shows that girls often stop "seeing" themselves in the fields of math and science by the time they reach high school.

The long-term goal of SWE's K-12 Outreach programming is to open pathways for girls to become engineers and create gender equity in the field.

STRENGTHS

- Established reputation from SWE
- Global reach
- Offers mentorship and networking resources

OPPORTUNITIES

- Growing demand for STEM education
- Collaborations and partnerships
- Opportunities to grow online engagement

WEAKNESSES

- Limited resources as a not-for-profit
- Underrepresentation challenges
- Volunteer-dependent

THREATS

- Competition with other STEM initiatives
- Resource constraints with limited funding
- Retention and engagement (sustaining interest)

III. CAMPAIGN OBJECTIVES

INCREASE SWENEXT ENROLLMENT

Here, we aim to significantly expand the reach of SWENext by boosting the number of participants, especially focusing on K-12 students. It seeks to encourage more students to join SWENext clubs, helping them explore engineering and STEM fields.

Achieve a 25% increase in SWENext club member registrations within the 31-day campaign period.

Establish SWENext clubs in at least 10 new regions or countries.

IMPROVE PARTICIPANT SATISFACTION

This objective focuses on enhancing the overall experience of K-12 participants within the SWENext program. It aims to provide more supportive interactions by creating mentorship opportunities through collegiate chapters, ensuring that participants feel valued and guided.

Partner with 15+ collegiate chapters for mentorship

Facilitate mentor-mentee matches for 200+ students within the campaign period.

ENHANCE SOCIAL MEDIA ENGAGEMENT

To increase the program's online presence and audience engagement and leveraging the #BeThatEngineer campaign, we seek to raise awareness, generate interest, and create a more significant impact through social media platforms, to support SWENext's mission.

Achieve a 100% growth in social media engagement

Increase the number of followers on SWENext's social media platforms by 50%.

IV. CAMPAIGN TARGET MARKET

DEMOGRAPHICS

- High school girls
 - 9-12th grade
 - 14-18 years old
 - All races and income levels

GEOGRAPHICS

- Rural to urban high schools across the US
 - Areas near collegiate chapters

PSYCHOGRAPHICS

- Students interested in problem-solving, design
 - May or may not be exposed to engineering

BEHAVIORS

- Use social media
- Participate in STEM clubs
 - Exploring various career paths
 - Excel in math and/or science
 - Have friends interested in STEM

PROFILE

HI, I'M JESSICA!
I'm a 10th grade student at Vista Green High

School in Bellevue, Washington.
I've always like creating and designing things, but I've never been had the chance to explore the field of engineering yet.

PRIMARY

DEMOGRAPHICS

- Elementary and middle school girls
 - K-8th grade
 - 6-13 year old

GEOGRAPHICS

- Near elementary and middle schools
- Areas dense in child populations

PSYCHOGRAPHICS

- Students exploring their interests
- Involved parents
- Engineer relatives

BEHAVIORS

- Enjoy hands-on activities
 - Arts and Crafts
- Participate in after school clubs

PROFILE

HI, I'M CLAIRE!
I'm 8 years old in
Juanita Elementary
School in Bothell, WA! I like science!

SECONDARY

V. CAMPAIGN ACTIVITIES AND SCHEDULE

CELEBRATE WOMEN'S HISTORY MONTH WITH SWENEXT!

The #BeThatEngineer campaign comprises of the following four activities throughout March, Women's History Month.

KEY

CURIE-OSITY KITS

BIG SIS MENTORSHIP

WOMENgineering QnA + Webinar

#BeThatEngineer CHALLENGES

S M T W Th F S

MARCH 1st - 30th

CURIE-OSITY Kits

Curie-osity kits are the perfect kits to make anyone **think like an engineer!** With a new kit delivered every other Friday to SWENext clubs across the country, they are perfect to inspire girls to #BeThatEngineer through building toys with a starter kit international shipping.

We will partner with NASA Engineer-turned internet personality, Mark Rober, and his “Build Boxes” from Crunch Labs. His "Build Boxes" are known for their entertaining yet educational content, which aligns perfectly with our mission to inspire young girls to #BeThatEngineer.

“ THINKING LIKE AN ENGINEER MEANS YOU’RE RESILIENT. IT’S GETTING BACK UP AFTER BEING KNOCKED DOWN AND APPROACHING THINGS DIFFERENTLY. ”

WHAT’S INCLUDED?

- A new build-it-yourself toy every 2 weeks
- Unlock a fun and education 15-30 minute video from Mark Rober with every box to become an engineering superhero
- Each box comes with a chance to win a trip to the CrunchLab to hang out with Mark Rober!

OBJECTIVE: IMPROVE PARTICIPANT SATISFACTION

Big Sis Mentorship

During this campaign, we will **launch** our new Big Sis Mentorship program, where we match high school girls in a SWENext club with a collegiate mentor, part of their SWE organization.

The Big Sis Mentorship program aims to create a bridge between high school girls in SWENext clubs and collegiate mentors who are part of the Society of Women Engineers (SWE) organization. SWE firmly believes that mentorship is a critical component in the success of women in engineering. By connecting young girls with experienced professionals who have walked a similar path, we hope to offer valuable guidance, support, and inspiration.

Through this mentorship program, high school students will have the opportunity to connect with collegiate mentors who can provide insight into their academic pursuits, career aspirations, and personal development. These mentors will serve as role models and sources of encouragement, helping mentees navigate the sometimes challenging and complex journey of becoming an engineer.

PARTICIPATING COLLEGIATE CHAPTERS

OBJECTIVE: IMPROVE PARTICIPANT SATISFACTION

WOMENgineering Podcast

The upcoming podcast, "WOMENgineering," is set to be a vibrant and empowering platform that celebrates the remarkable achievements, experiences, and voices of women in the fields of engineering and STEM. With a mission to inspire and educate, "WomEngineering" will delve into an array of topics relevant to STEM and engineering, offering listeners a unique opportunity to explore the journeys, challenges, and triumphs of women in these fields.

This podcast will feature inspirational interviews with accomplished female engineers, scientists, and STEM leaders, allowing them to share their personal stories and insights. It will also provide valuable career guidance, educational pathways, and mentorship advice for those navigating the complex world of STEM. "WOMENgineering" will spotlight innovations, innovations that are shaping our world, and introduce the brilliant minds responsible for these groundbreaking developments. Additionally, this podcast will emphasize the importance of community building within STEM, discussing various initiatives and organizations that promote gender diversity.

Podcast episodes will be released every Saturday, and will feature renowned women in STEM, including **Mayim Bialik, Jocelyn Bell Burnell, Katherine Johnson, and Annie Easley.**

OBJECTIVE: INCREASE SWENEXT ENROLLMENT

#BeThatEngineer Challenges

To attract our target demographics, we plan to roll out social media campaigns on Instagram, the visual platform that's perfect for showcasing engineering projects and stories through images and videos. With its broad and diverse user base, including many young women, it's ideal for connecting with our target audience.

Our Instagram campaign will include a variety of content: inspirational stories, interactive challenges, engineering project insights, live Q&A sessions, and motivational quotes. We aim to inspire aspiring female engineers, create a supportive community, and promote diversity in STEM.

As part of our #BeThatEngineer social media campaign, we're excited to introduce holiday-themed challenges for the month of March to celebrate three special days!

Holiday-themed Challenges

MARCH
8TH

INTERNATIONAL WOMEN'S DAY

SheSTEM Spotlights

In honor of International Women's Day, we are excited to launch the SheSTEM Spotlights campaign, showcasing the remarkable accomplishments of female engineers and SWENexters. We will share stories, quotes, and profiles of prominent female engineers and SWENext participants to inspire girls to #BeThatEngineer.

MARCH
14TH

PI DAY

#PI-oneering

With the #Ploneering challenge, we're spicing up math with creativity. Share your innovative engineering interpretations of π (pi), from projects to artwork or baked goods!

MARCH
20TH

FIRST DAY OF SPRING

With the arrival of spring, we're launching a challenge that centers around environmental engineering and sustainability. Participants will be encouraged to share their ideas, projects, or tips on how engineering can contribute to a greener and more sustainable world, with the **#GREENgineering** hashtag!

OBJECTIVE: ENHANCE SOCIAL MEDIA ENGAGEMENT

RETURN ON INVESTMENT

While the \$XXX investment may not represent immediate monetary returns, its true value lies in empowering and educating future female engineers, expanding our global presence, and fostering mentorship and support networks. These outcomes, in turn, contribute to a brighter, more diverse, and inclusive future in STEM. In the long term, this investment is a testament to the commitment of SWENext and its supporters to drive positive change and impact the lives of young women pursuing engineering.
